Respected Hiring Authority,

I am about to Explain that why I am applying to this job why I Considered this as future pathway of my Career and why I am the Perfect one to fulfill this legacy.

I am applying to this job because my qualifications fulfils all requirements in Direct way or more than better way. I have worked with Utilities witch are required to be Experienced for this job.

Why I considered this company as my future pathway for Career. Because I need to get experienced with new technologies all around the world and I also open to Relocate in world anywhere so that's another reason for choosing this as Career pathway.

Now is the turn for what I worked on. I worked with following Utilities at companies which you can find on CV. Here are only what I Experienced on.

*Android Development Java SDK C++ NDK

*System Engineering (Electronics)

*Databases, Networks

*Software Security Testing

*Secure Programming, Bug testing

*Operating Systems

*System Maintenance.

I am a Package rather than just a Programmer or Technician or Network Engineer or Security Pentester. A companies hire different people for these jobs but if someone is Programmer then he is better then any programmer who can't troubleshoot his own workstation.

Final Quote "In today's world Security & Efficiency is only war So why not let's begin with Hiring me". Best for Business
